

PETROMAT® Enviro™ is a needle-punched nonwoven polypropylene paving fabric that is millable, recyclable, and compatible with placement directly on milled and smooth pavement surfaces. PETROMAT Enviro is a moisture barrier and stress absorbing interlayer beneath asphalt overlays or chip seals. Petromat Enviro has 360 degrees of strength homogeneity, not achieved by scrim reinforced geosynthetic interlayers, is patent pending and produced by Propex to meet the following values when tested in accordance with the methods listed below.

PETROMAT Enviro conforms to the property values listed below. Propex performs internal Manufacturing Quality Control (MQC) tests that have been accredited by the Geosynthetic Accreditation Institute – Laboratory Accreditation Program (GAI-LAP).
